

Solstice and Sky SILICONE COMBO

DDMWorks offers a full silicone package for 2.0L LNF engines.

This is the full trifecta of high quality silicone parts for your 2.0L LNF engine. This packaged comes with the Intake tube, throttle body elbow and upper radiator hose, but can be purchased separately. The upper radiator hose also fits the 2.4L's.

If you are pretty handy with tools the silicone can be installed in less than 45 minutes, however we suggest that you schedule at least an hour for the installation incase you run into any problems.

If you have any questions during the installation you can call us at (864) 907-6004 or email us at Tech@ddmworks.com

INSTALLATION TIPS

Throttle body elbow:

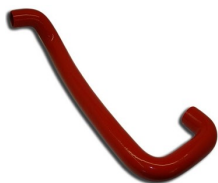

Remove the stock and replace with the new*, using the stock clamps.
*fitment note: logo faces in the downward direction

Intake tube:

Remove the stock and replace with the new * using the stock clamps. For ease of installation, release/open the hose clamps fully and replace after the hose is in place.
*fitment note: logo faces in the downward direction

Upper Radiator hose:

Remove the stock and replace with the new * using the stock clamps. As you remove the stock piece you will loose some coolant, you will need to re-fill and flush your system. We also suggest rotating your new radiator hose up slightly to prevent it from rubbing on the radiator fan shrouding.
*fitment note: logo faces in the downward direction
